SUMMARY

Full Stack Software Engineer with 4+ years of experience building scalable SaaS platforms using Next.js, NestJS, TypeScript, PostgreSQL, AWS, Docker, and AI APIs. Experienced in designing multi tenant architectures, microservices, cloud deployments, payment systems, authentication, and enterprise workflow applications. Passionate about building production ready software that scales.

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, PHP, Python
- **Frontend:** React.js, Next.js, Vue.js, Tailwind CSS, shadcn/ui, Ant Design
- **Backend:** NestJS, Express.js, GraphQL, Laravel
- **Databases:** MongoDB, PostgreSQL, MySQL, Prisma ORM, TypeORM
- **State Management:** Redux Toolkit, Zustand
- **DevOps & Deployment:** AWS, Docker, CI/CD, GitHub Actions, Vercel, Railway, Netlify
- **Caching & Optimization:** Redis, RabbitMQ
- **Gen AI:** OpenAI API, Google Gemini API, LangChain, AI Integration, AI Chatbots
- **Tools & Other:** Vitest, Jest, Git, GitHub, Postman, Figma
- **Soft Skills:** Problem Solving, Communication, Team Collaboration

WORK EXPERIENCE

❖ Junior MERN Stack Developer - Onsite | SH | [LINK](#)

March 22 – July 23

- Developed and maintained production grade **monolithic and microservices** based web applications using the MERN Stack, GraphQL, and Laravel.
- Designed and **implemented core microservices**, including **Authentication, Catalog, Order**, and **Notification**, with JWT authentication, RBAC, Redis caching, RabbitMQ messaging, and WebSockets.
- Built scalable **REST and GraphQL APIs** and integrated them with React.js and Next.js frontends to deliver high-performance, real-time user experiences.
- **Containerized applications with Docker**, contributed to production deployments, and wrote unit and integration tests to improve application reliability and maintainability.
- **Contributed to the development of multiple web applications** including Food Ordering and Hospital Management (HMS) collaborating in an Agile development.

❖ Thinkasa | ASA Global | Remote Job | [Link](#)

Nov 23 – Present

- **Promoted from Mid Level Full Stack Engineer to Associate Software Architect**, expanding responsibilities from full-stack development to solution architecture, cloud infrastructure, and technical leadership across multiple SaaS products.
- **Delivered 4 production SaaS platforms** and collaborated on **2 additional enterprise products**, owning the complete software development lifecycle from architecture and development to deployment, optimization, and long term maintenance.
- **Designed and implemented a cost optimized AWS ECS Fargate deployment platform** that currently hosts **5 production SaaS applications** using a shared VPC, Application Load Balancer (ALB), ECS Cluster, and Amazon RDS architecture with isolated ECS Services, Target Groups, Security Groups, and application resources.
- **Built scalable multi-tenant SaaS platforms** using Next.js, NestJS, the MERN Stack, PostgreSQL, REST APIs, GraphQL, RBAC, AI integrations, and secure workflow-driven architectures.
- **Partnered closely with DevOps engineers** to design cloud infrastructure, automate deployments, optimize application performance, and establish reusable deployment standards across multiple production environments.

FEATURED PROJECTS

★ **Recommendas | Professional Recommendation Platform**

[Link](#) | Private

- Developed a workflow-driven multi-tenant SaaS platform for managing professional recommendations, compliance workflows, secure document handling, and organization-level tracking.
- Designed configurable workflow engines, immutable versioned submissions, RBAC, audit logs, and secure recommendation pipelines to support healthcare, staffing, education, and professional service organizations.
- Built a real time audit trail that recorded every user and system event across the recommendation workflow, including request creation, email opens, writing progress, submission, document access, and unlock events for complete operational visibility.
- **Tech Stack:** Next.js, NestJS, PostgreSQL, Prisma, AWS, Redis, Docker, RBAC, REST APIs, Multi Tenant Architecture.

★ **Chronoca | Workforce Productivity & Time Tracking SaaS**

[Link](#) | Private

- Developed a workforce productivity and time-tracking SaaS platform enabling organizations to monitor work sessions, employee activity, productivity insights, and operational performance.
- Built and published the Chronoca Chrome Extension on the Chrome Web Store for browser-based activity tracking, automatic session synchronization, and real-time data collection. Developed the end-to-end desktop application and collaborated on backend architecture, scalable SaaS workflows, and cloud deployment.
- **Tech Stack:** MERN Stack, WXT.dev, Electron, Chrome Extension API, PostgreSQL, AWS ECS, Docker.

★ **Accompliq | Digital Legacy & Personal Organization Platform**

[Link](#) | Private

- Developed a SaaS platform for personal organization, digital legacy management, and long-term record keeping, enabling users to manage goals, milestones, documents, experiences, and personal stories in a centralized workspace.
- Built secure document workflows, user record management, and scalable cloud-based features while contributing to the platform's architecture, development, and production deployment.
- **Tech Stack:** Next.js, MERN Stack, PostgreSQL, AWS, Document Workflows, Cloud Deployment.

★ **Balady Services Platform | Travel Agency Operations System**

[Link](#) | Private

- Developed a web-based travel agency management platform for managing customers, Saudi Balady health certificate applications, company records, and document processing workflows.
- Integrated Saudi Balady Services to streamline customer onboarding, health certificate verification, application tracking, advanced search, and secure document management, improving operational efficiency for the agency

★ Masjid OS | Mosque Management Ecosystem | Coming Soon

- Building a complete mosque management platform with a web-based admin dashboard and companion mobile application to connect local communities with nearby mosques.
- Developing modules for prayer management, announcements, janazah, donations, welfare programs, events, and community engagement with real-time notifications.
- Tech Stack: Next.js, NestJS, React Native, PostgreSQL, Maps, Push Notifications, AI Integration.

★ ReturnX | AI Digital Wellness Platform | Coming Soon

- Building a powered digital wellness application that helps users overcome pornography addiction through real-time adult content detection and comprehensive device-level protection.
- Developing browser, application, and media content filtering using Android Accessibility Services, Device Administrator controls, AI-based content detection, uninstall protection, and centralized parental controls.
- Tech Stack: React Native, NestJS, AI Vision, Android Accessibility API, Device Admin API, PostgreSQL.

★ AI Appointment Booking Platform | Multi-Tenant SaaS | Coming Soon

- Building a multi-tenant appointment booking platform for service businesses featuring staff management, scheduling, appointment calendars, service management, website builder, and embeddable AI booking widgets.
- Developing AI-powered appointment booking through websites with upcoming WhatsApp and voice-call booking capabilities, enabling businesses to automate customer interactions.
- Tech Stack: Next.js, NestJS, PostgreSQL, Redis, OpenAI API, Docker, AWS.

CERTIFICATES

Full Stack Web Development | Govt | [LINK](#)

March 2024

- Successfully completed **6-month Government e-Hunar Certification in Web Development**, gaining hands-on experience with both **MERN Stack** and **Laravel** frameworks.
- Completed multiple real-world projects under professional guidance, simulating industry workflow
